Smart home. Safe abode.

abode keeps you and your home safe. It also makes it super smart. Our solution is a beautifully designed home security system that can be configured specifically for your home.

So much more than a gadget

abode includes easy to use software and powerful, no-contract plans to keep you connected and protected every day of the year.

Powerful security

With a wide range of sensors and devices, you can be confident that abode will protect your home and grow with you. It is packed with the most popular wireless technologies to integrate with the most popular connected home products.

Mobile and web access

With no monthly fee you can monitor your home security system anywhere in the world and take action on your smart phone. Our optional, on-demand professional monitoring and cellular backup add an extra layer of security to your home at a fraction of the cost of traditional security providers.

No contracts

We never lock you into long-term contracts and don't think you should be either. Our plans are easy to understand with no hidden fees. Simply choose your term and you can cancel at any time. No games here, it's that simple.

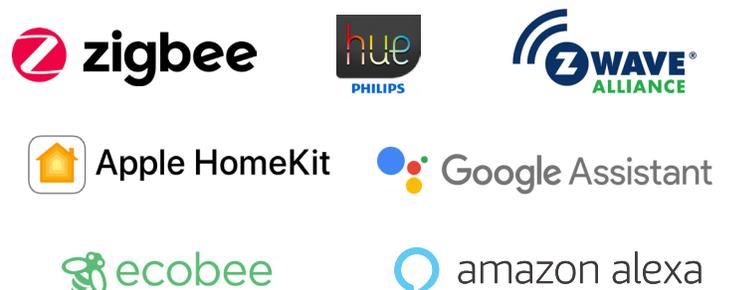

Sensors for total home protection

In order to provide ultimate protection your security system should have different kinds of protection devices to keep you and your family safe. abode offers the most types of sensors to protect:

-  Door & window sensors
-  Cameras
-  Water sensors
-  Smoke Sensors
-  Sirens
-  Motion Sensors

Works with abode

We also integrate to many third-party devices to give you the ultimate in smart home security flexibility. Control from one app or setup automation rules with abode CUE.

Keeps getting smarter

We're passionate about home security and making your home smarter. We continually update the software on the abode gateway to make it smarter and release updates to our mobile and web applications.

We packed our solution with many different wireless standards so you can be rest assured that your abode will continue to innovate and support the most popular connected products like voice assistants, locks, thermostats, lights, and much more.

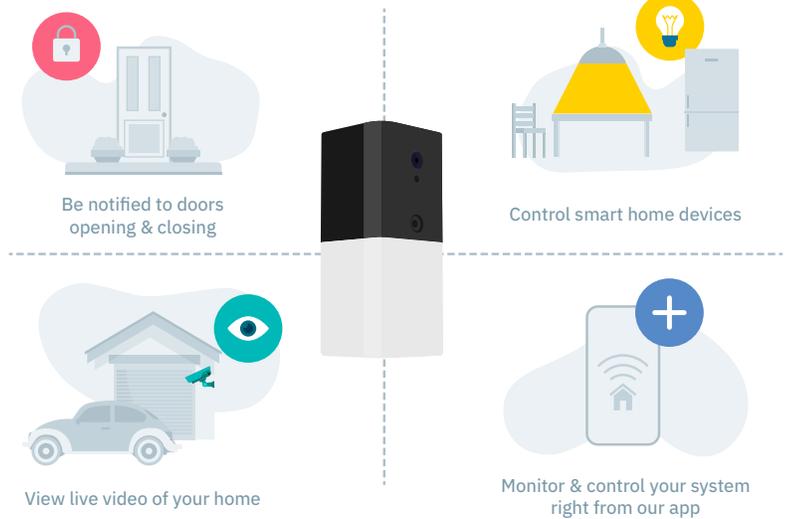

Home automation. Made easy.

Meet abode custom engine

abode isn't just a home security solution, it's the foundation for your smart home. abode's CUE (Custom Engine) makes automating scenarios super easy. It's easy with CUE, simply follow our point and click wizard to make your home work for you.

- ✓ Turn on the outside lights after sunset when you drive into your drive way.
- ✓ Automatically make sure your doors are locked when everyone leaves your home.
- ✓ Receive an alert if water is detected or the basement reaches a certain temperature.

Transparent Pricing.

No two homes are the same and your needs change over time. Simply choose the plan that you need today, and have the flexibility to change it tomorrow.

Which gateway is right for me?

Having trouble deciding between our traditional gateway and iota? No problem, we have you covered! Take a look at the list of features below to help determine which gateway better suits your needs.

Features and Services

iota

Gateway

Smart Home Hub

The ability to communicate with and control your abode and compatible smart home devices.

Built-in Motion Detector

iota features a built-in motion sensor while the gateway connects to separate abode motion sensors.

Wi-Fi enabled

Wi-Fi allows you to place the device anywhere you see fit.

Compatible with Z-Wave and Zigbee devices

Control your smart home devices with powerful integrations.

Built-in Streaming Camera

1080p camera captures video when alarms are triggered or whenever you request.

Compatible with Amazon Alexa and Google Home Assistant

Control your smart home devices all with your voice.

THE ULTIMATE CONNECTED HOME

Connects and protects what matters most.

Meet the abode Gateway Security System.

Welcome To The Last Home Security System You Will Ever Need.

We've re-imagined everything around what a home security experience should be and created something that is remarkably simple to setup and easy to use. With this kit, you'll have everything you need to be on your way to a contract-free home security system that is yours for life. Build your system to fit your home by adding devices only as needed. Best of all, you can take it with you when you move and easily set it up in your new home.

Optional No-Contract, 24x7 Professional Monitoring

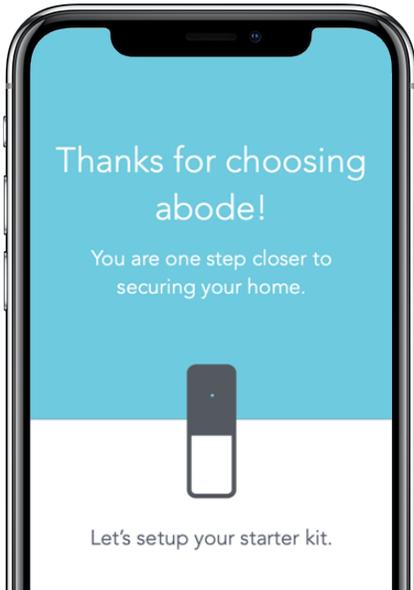

Easy Self-Install With No Tools Or Wiring Required

Security Notifications Sent Right To Your Phone From The Free abode App

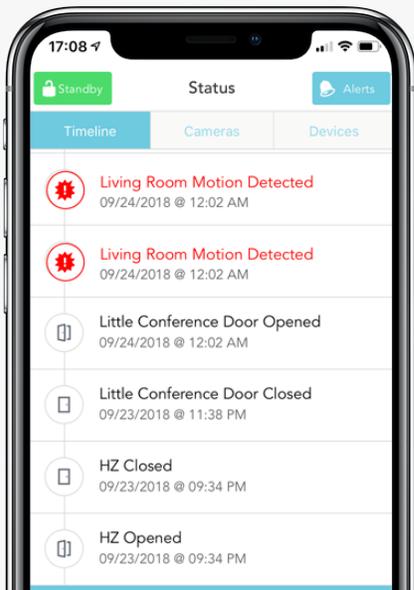

Beautiful Hardware. Meet the Smart Security Kit

GATEWAY

The heart of your system.

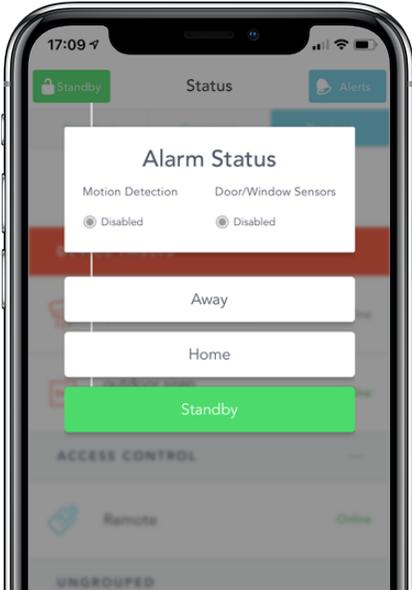

The gateway communicates with all of the wireless devices around your home and sends you notifications as soon as trouble is detected, allowing you to act quickly. The gateway can connect with up to 160 devices, meaning you can fully protect every inch of your home with complete confidence. Additionally, the gateway comes packed with smart home features that allow you to control lights, locks, garage doors, and more all right through our app.

MOTION SENSOR

We'll watch for activity.

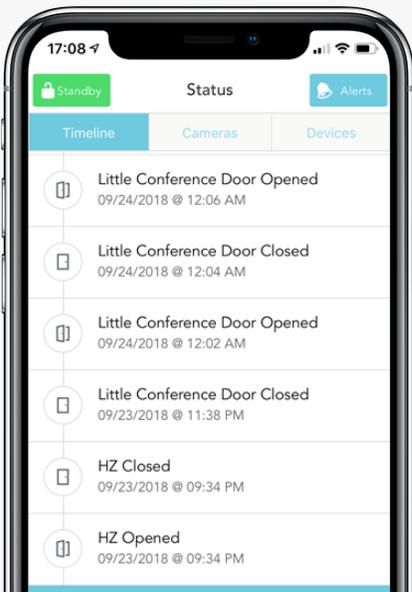

The included motion sensor detects movement while your system is armed. With a detection field of 110 degrees and adjustable sensitivity levels, you can rest assured knowing anything that passes by will be picked up.

KEYFOB

Arm and Disarm with the press of a button.

The included Key Fob is a quick and easy way to arm and disarm your system remotely. Add it to your key ring or throw it in your pocket and simply press the button of the status you'd like to set on your way out or in - making the "did I set the alarm?" worry a thing of the past.

MINI DOOR SENSOR

Protect the perimeter of your home.

Our easy-to-install (with simple adhesive peel & place) Mini Door/Window Sensor allows you to protect almost any door or window in your home. The sensor detects when doors and windows open or close and sends you an immediate notification if anything occurs while your system is armed.

THE ALL-IN-ONE HOME SECURITY DEVICE.

Meet iota. Smart. Secure. All-in-one.

Award winning home security.
Powerful home automation.

All-In-One Home Security.

iota is an all-in-one home security device that includes built-in HD camera, motion sensor, and two-way voice. Wi-Fi capability means you can put iota almost anywhere in your home. This allows you to take advantage of its features by putting it in the spot that makes the most sense for you. iota also allows you to connect up to 160 smart devices so you can ensure every inch of your home is protected. To get started, simply purchase an iota starter kit and add devices as needed.

Easy Tool-Free Set Up Means You'll Be Up & Running Within 30 Minutes.

Receive Notifications Right To Your Phone If Your Alarm Is Triggered.

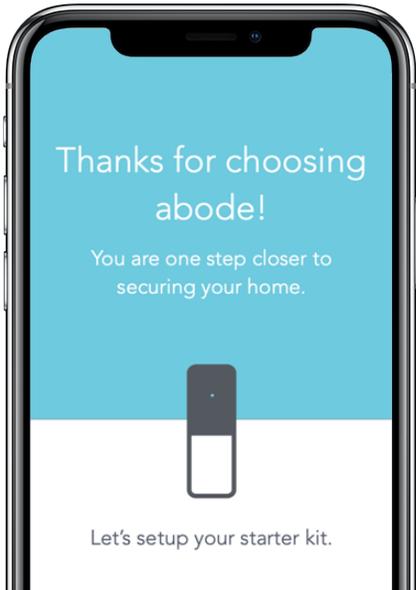

Add Multiple Users To Your Account So Your Family/Housemates Can Arm & Disarm The System.

Built-In 1080 Camera Captures Video Of The Cause Of An Alarm And Sends It Right To Your Phone. Allowing You To Quickly Visually Verify If There Is Cause For Concern.

Beautiful Hardware.

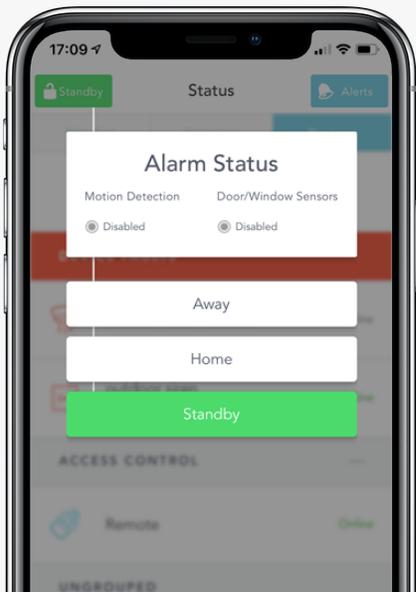

Get to know iota All in One Security Kit

IOTA

All-In-One Home Security... In HD.

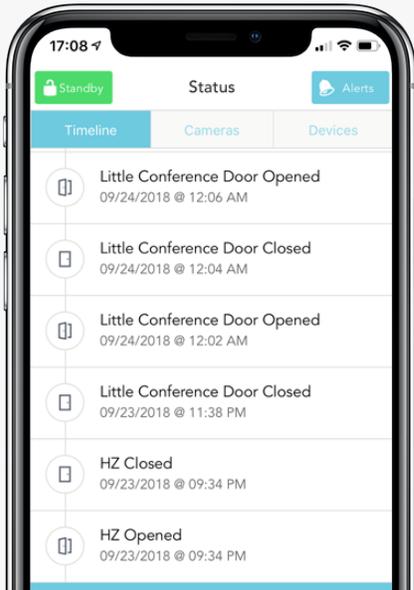

Capture video in HD, detect motion, communicate with two-way voice all right from this device. iota acts as the brain of your system, allowing you to connect up to 160 devices and sending you notifications right to your phone as soon as something is detected.

KEYFOB

Control Your System With The Touch Of A Button.

The Key Fob is always ready to arm and disarm your system with ease. Hit the disarm button before you enter your home or the arm button as you're leaving to make sure that your home is always protected. A compact device, the Key Fob is easy to keep with you in your pocket, purse, or on your keychain.

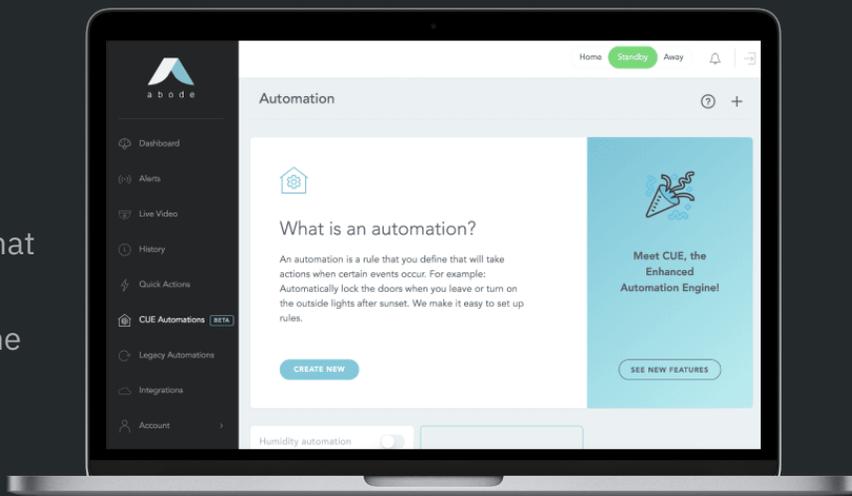

MINI DOOR/WINDOW SENSOR

Protect the perimeter of your home.

Our easy-to-install (with simple adhesive peel & place) Mini Door/Window Sensor allows you to protect almost any door or window in your home. The sensor detects when doors and windows open or close and sends you an immediate notification if anything occurs while your system is armed.

Meet abode CUE

The complete home automation platform that connects to and controls your smart home devices. Set up actions that make your home work for you.

Why did we create CUE?

We created CUE to make home automation easy! It's point and click and easy to setup simple or complex rules to automate your home with scenes and actions.

Trigger automations based on your location.

Configure rules to run when something happens.

CUE is included with every abode system and includes these features:

Guided setup process on the abode mobile or web apps

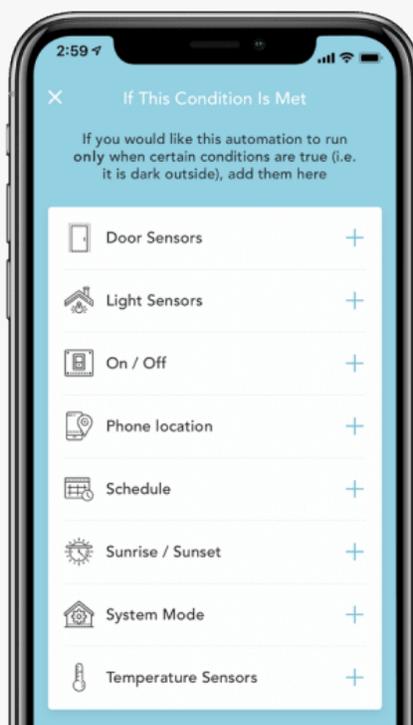

Use sunrise & sunset for triggers or conditions

Set multiple triggers for one rule to make rule management easier.

Define conditions when you want something to run (i.e. if you aren't at home)

Enhanced geo-location interface

Ability to fine tune triggers and actions (i.e. only run if a door is open longer than...)

Black out periods to prevent automations from executing at inconvenient times

Set it and then let it work for you

Conditional Automations

Only turn on the outdoor lights when the back door has been open for two minutes if it is dark outside (condition).

2

Action

3

Condition

1

Trigger

1

STEP 1

WHEN: this event occurs (Trigger)

A trigger is an event, such as door opening, that causes an automation to run. Example triggers include motion detected, a door or window opening, a phone entering a geofence, or a specific time.

2

STEP 2

THEN: Perform this action

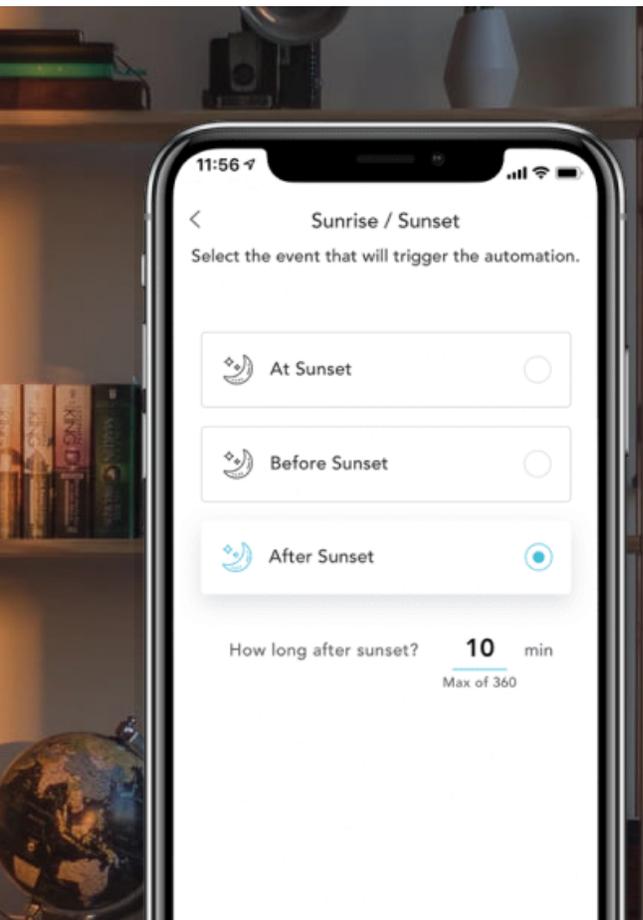

An action is an event you would like to perform when the automations is run. An action can be an event like taking photo, recording a video, turning on a light, sending a notification, arming your system, or something else that your systems or devices support.

3

STEP 3

ONLY IF: this condition is true

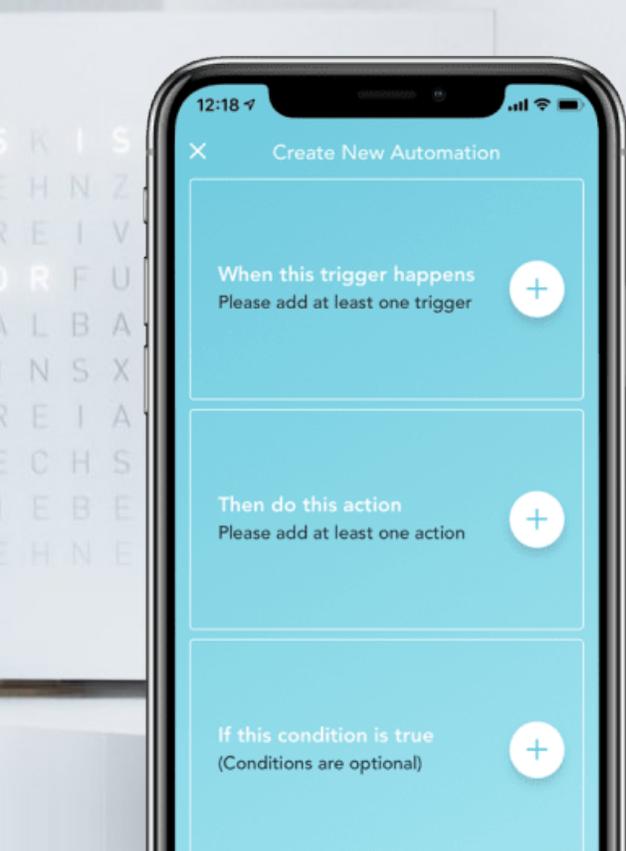

A condition is an optional settings that insures that automation only runs if the conditions are true. For example, you may want to only turn on the hallway lights when the front door opens if it is dark outside (condition).

Sunrise & Sunset Support

We've designed dynamic sunrise and sunset support based on the latitude and longitude of your home's address. That means throughout the year as sunrise and sunset change, your gateway intelligently adjusts these times every day.

- ✓ Your abode gateway stores sunrise and sunset times so it works all the time
- ✓ Setup rules to occur when sunrise or sunset occurs
- ✓ Setup certain rules to only occur during day or night

Create Automations on Mobile

You can create rules on your phone in a few easy steps with our intuitive home automation wizard. We made it simple so that novices and experts alike can create rules quickly and easily.

- ✓ Already available in current iOS and Android apps
- ✓ Every abode system and plan supports CUE
- ✓ Get started today

Plays well with others. Works with abode.

The complete home automation platform that connects to and controls your smart home devices. Set up actions that make your home work for you.

Door / Window Sensor

Our longest battery life sensor that detects when doors or windows are opened or closed.

Door & Window Sensors designed for your home.

Our Door/Window Sensor is the perfect solution for protecting the perimeter of your home. Here are some features of the sensor:

The sensor offers the longest battery life out of all of our sensors – up to 10 years

Using the abode apps, you can see the status of any door or window at any time

Program your abode system to take actions like turn on the lights when the front door is opened

Easy installation with no tools required - simply peel and stick the sensor and magnet in the correct locations

Using abodeRF communication, the sensor can be installed anywhere in most homes because it easily communicates through walls to the abode gateway

Sleek Design. Smart Operation.

The Door / Window Sensor was designed in bright white with clean lines to make it look great on any door or window

✓ Long Battery Life

The Door/Window Sensor operates for up to 10 years under normal operating conditions

✓ Versatile Installation

The sensor and magnet have been optimized for a wide range of installation options including doors and windows with trim. The magnet and sensor can be installed up to 3/4" apart for correct function

condensing.

Mini Door/Window Sensor

Protect your doors and windows with abode's smallest sensor.

Keeps you safe whether you are at home or away.

Our Mini Door/Window Sensor protects your home around the clock by notifying you to doors or windows opening and closing. Simply set the abode system to Home or Away mode and the and abode will do the rest

Long battery (and user replaceable) life of up to 4 years

Superior range with abodeRF technology

Trigger automations when open or close events detected

Quick and easy to setup with simple adhesive installation

Discreet small design for an unobtrusive installation

Check the abode app at any time for the current status

Installs on all door types

The Mini Door/Window Sensor is easily installed by peeling and sticking the sensor and magnet on the door or window and corresponding frame that you would like to protect. It protects your home in both away and home modes.

✓ Easy Install

Simply peel the adhesive and mount it in the desired location

✓ Grows With You

One Mini Door/Window Sensor is included in every starter kit. abode is easily expandable and more sensors can added to protect every entry point into your home

Specifications

Communication Protocol: 433MHz

Recessed Door/Window Sensor

Completely hidden and completely protected.

100% transparent installation.

Our Recessed Door/Window Sensor and included magnet install completely in the door or window and frame of your choosing for a hidden application

Long battery of up to 10 years

User-replaceable battery

Setup automations when doors & windows open or close

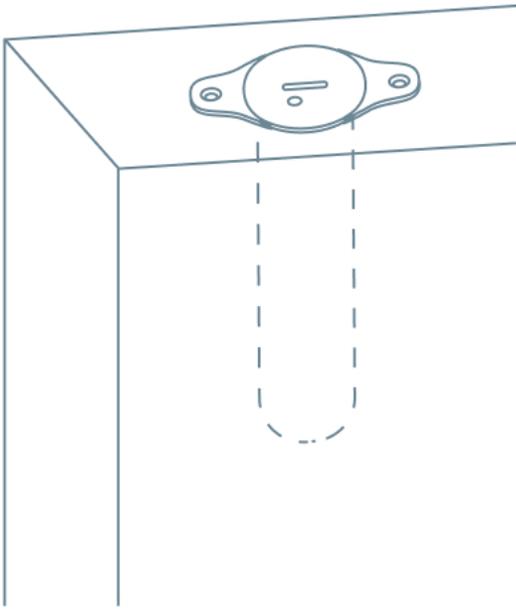

Simple installation - requires a drill

Discreet small design for an unobtrusive installation

Check the open/close status from the abode mobile or web app

Installs inside to completely hide

The Recessed Door/Window Sensor functions exactly like our other door sensors and will send a signal every time the door or window is opened or closed. This sensor is one of the few sensors from abode that requires some minor handy work by using a drill to put a hole in the door/window and frame to insert the sensor

Easy Installation with Drill

Simply follow the mounting procedure found on our support site [here](#)

Long, Replaceable Battery

Once you install the sensor, that's it! The long-lasting (up to 10 year) battery can easily be replaced.

2.72 inches (69 mm)

Slim Strip Door/Window Sensor

Designed for doors and windows that have a gap between the door/window and frame for a discreet installation.

Discreetly protects the perimeter of your home.

Our Slim Strip Door/Window Sensor protects your home regardless of whether you are at home or away. Simply set the system to Home or Away mode and the sensor will do the rest with these powerful features:

Discreet, thin design for an unobtrusive installation

Quick and easy to setup with simple adhesive installation

Installs between the gap of the door/window and the corresponding frame

Perfect for any door or window with a gap between the door and frame

Trigger automations when open or close events detected

Check the abode mobile or web app at any time for the current status

Know when a window opens.

Not only will this sensor protect your home when you are away, it can also alert you to any door or window that opens even when the system is unarmed. Simply set the notification settings for the sensor and you can receive a push or email notification regardless of system mode.

✓ Slim Design

The Slim Strip Door/Window Sensor installs discreetly with doors or windows with a gap so it is always hidden when its closed.

✓ Easy Fit

By placing three quarters together, you can measure the needed gap for proper installation of the slim strip sensor.

Technical Specs

Size and Weight

Width: 3/4"
Depth: 3/16"

Siren Specifications

Battery: 8 Years, Lithium-ion
(not replaceable)

Communication Protocol: 433MHz

Vibration Glass Break Sensor

Perfect for any window in a vulnerable part of your home, our Vibration Glass Break Sensor is designed to detect major or consecutive minor shocks to the pane and alert you immediately.

Small Sensor. Big Results.

Our Vibration Glass Break Sensor is extremely easy to install and we've designed it with these powerful features:

Small, sleek design. Slightly larger (diameter) than the size of a quarter

Simple installation – peel the adhesive and stick to the desired window

Three adjustable sensitivity levels

Regular test signals to ensure proper operation

Long battery of up to 4 years with replaceable battery case

Stop intruders in their tracks

Maximize the effectiveness of your security system by providing your family and business with an even higher level of protection. This wireless shock sensor is lightweight and easy to install on any glass window, door, roof, or safety box and capable of detecting two different types of forcible attacks: a single major shock event, or accumulated consecutive minor shock attacks.

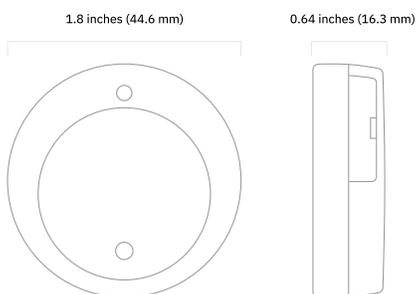

- ✔ Detects major shock attack or accumulated minor shock attack
- ✔ Adjustable sensitivity threshold levels: Low, Medium, High
- ✔ Wireless and lightweight for easy installation

Technical Specs

Size and Weight

Diameter: 1.8 inches

Depth: 0.64 inches

Specifications

Communication Protocol: 433MHz

Power Source: 3V CR2477 Lithium battery x 1.

Battery Life: 13.5 years*.

Operating Temperature: -10°C to 45°C (14°F to 113°F).

Operating Humidity: Up to 85% non-condensing.

Acoustic Glass Break Sensor

Intelligently listens for the sound of breaking glass in an entire room

Economically protect a single room with multiple windows with a single sensor.

25 Foot (line of sight) detection range with a single sensor

Easy mounting with no tools needed on most ceilings or walls

Completely wireless and battery (2.5 years) operated

Regular status checks to ensure proper operation

4 selectable sensitivity settings (Slight, Low, Medium, and Max)

Cover multiple windows with one device.

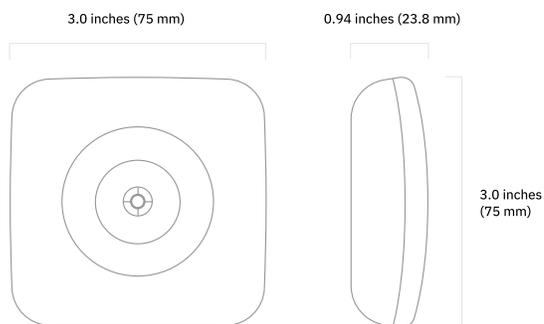

The acoustic glass break sensor is the perfect solution for rooms with multiple windows as its twenty-five foot detection range provides ample coverage for even large rooms. Simply place within range of a cluster of windows and let abode do the rest.

- ✓ Installs on the ceiling and detects glass break sounds up to 25-feet
- ✓ Simple tool-less installation with easy peel and stick adhesive application

Technical Specs

Size and Weight

Height: 3.0 inches
 Width: 3.0 inches
 Depth: 0.94 inches

Specifications

Communication Protocol: 433MHz.

Power Source: 3V, CR123A Lithium battery x 1.

Battery Life: 2 years*.

Operating Temperature: -10°C to 45°C (14°F to 113°F).

Operating Humidity: Up to 85% non-condensing.

*Note: Actual battery life may vary due to device settings, operating environment and usage activity. This sensor must be directly viewable from the windows it is protecting. It cannot detect glass breakage through walls, doors, etc.

Motion Sensor

Our Motion Sensor detects movement when the system is armed in “Away” mode to alert you to any movement while you are gone. It’s perfectly suited to be installed in large rooms with many windows, hallways, or entryways.

Smart and simple.

Here are some powerful features of abode’s motion sensor:

Advanced intelligence designed to prevent false alarms

Built-in LED to test optimal placement and alert you to faults

Wide detection keeps you protected with 110° field of view and 35 feet of range

abodeRF allows for easy installation away from gateway and communication through walls

Long battery life of up to 5 years

Easy, no tools required installation on a flat wall or in a corner

Protect Every Inch.

The Motion Sensor is a perfect way to affordably protect every inch of your apartment or home. The sensors install easily using included adhesive tape on a flat wall or in the corner of a room with an included corner mount.

✓ Small, Sleek Design

The small, sleek design allows you to install a motion sensor unobtrusively in any room

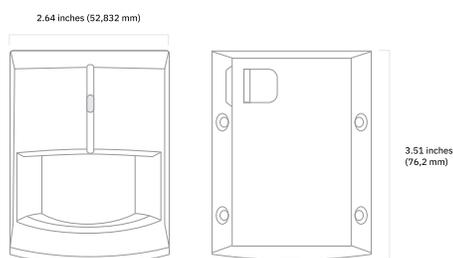

✓ Install Anywhere

The motion only capability works perfectly in bedrooms or personal living spaces to capture motion only

Technical Specs

Size and Weight

Height: 3.51 inches
Width: 2.64 inches
Depth: 2.09 inches

Specifications

Detection Method: PIR, Embedded microprocessor controlled with advanced ADSP algorithms to minimize false alarms

Supervision: Randomized supervision signals to ensure proper function

LED Indicator: LED to alert to faults and motion detection during testing

Exterior Case: Durable, white case to prevent insects and dust from entering interior of sensor

Battery Life: Up to 5.5 years in normal operating conditions (temperature, distance from gateway, custom settings, and duration of system arm away mode can shorten or lengthen battery life)

General

Communication Protocol: 433MHz

Package Contents: (1) Motion Sensor, (2) Pre-Inserted 1.5V AA Alkaline Batteries (with pull tab to activate)

Operating Humidity: Up to 85% non-condensing

Operating Temperature: 14°F to 113°F

Operating Humidity: Up to 85% non-condensing.

Wide Angle Motion Camera

Equipped with the same features as our Motion Sensor, this unit is equipped with a camera. Visual Verification allows you to see what triggered an alarm.

See it and take action.

abode's Wide Angle Motion Camera is an important part of your home security solution and is packed with features:

Wide angle camera lens leaves no blind spots

Automatically snaps three photos when motion is detected while you're away

Quick and easy installation that requires no tools

Great Range (for further distances from the gateway)

Long battery life of up to 5 years

Flexible mounting options (flat surface or corner mount) works in every home

Ultimate protection

The motion camera will automatically take three 640 x 480 photos and quickly send them to your phone when your system is in Home or Away mode.

✓ Day or Night

A built in flash illuminates the area in low light conditions

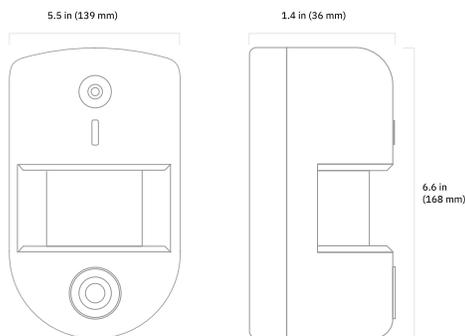

✓ Fully connected

The Wide Angle Motion Camera is fully integrated into your abode smart home. Set it up to take a picture when a door opens or any other event

Technical Specs

Size and Weight

Height: 6.6 in (168mm)
 Width: 5.5 in (139mm)
 Depth: 5.5 in (36mm)
 Weight: 1.7 lbs (700g)

Camera

Lens: VGA CMOS Camera.
 Resolution: 640 x 480 pixels or 320 x 240 pixels (for rapid transfer).
 Night Illumination: Automated LED Flash (range up to 15 feet).

Other

Communication Protocol: 433MHz

abode Cam

See what is going on in your home 24 x 7 with abode's HD streaming camera.

The perfect companion to your abode system.

The abode Cam is tightly integrated with your home security system and packed with these powerful features:

Full HD (1920 x 1080) resolution for recorded video clips

Night vision mode with IR illumination in low light environments

Pre-Alarm recording provides video footage of what occurred moments before an alarm

Wi-fi enabled for flexible placement

Flexible mounting lets you easily install on table or wall

Speaker and microphone allow for two-way voice communication (feature coming soon)

Check-in from anywhere.

Want to record video when something happens at home? Want to check in to make sure your children made it safely home from school? With the HD abode Cam you can check in from anywhere at anytime.

Wide Angle Lens

152 degree, wide angle lens provides maximum coverage with no blind spots

Two Way Audio (coming soon)

Simply use the abode app to talk and your voice will play through the included speaker

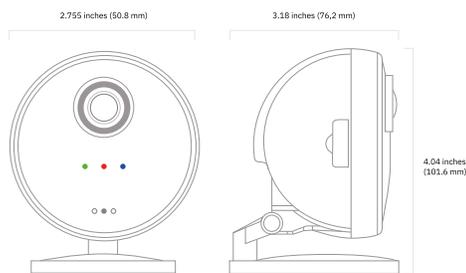

Technical Specs

Size and Weight

Height: 4.04 inches (101.6 mm)

Width: 2.755 inches (50.8 mm)

Depth: 3.18 inches (76.2 mm)

Camera

Resolution: 1920 x 1080

Alarm Clip Duration: 10 seconds (3 seconds pre alarm)

Video Compression: H.264 & MJPEG

Frame Rate: 1920 x 1080 at 30fps

Audio: Built-in microphone & speaker, two-way audio (coming soon via cloud software update)

Night Mode: Grey Scale with IR (Infrared)
Fill Light

Field of View: Depth 152°, Horizontal 127°, Vertical 67°

Time: Overlay time and date stamp synchronized with NTP server

Network Specifications

Ethernet: 10/100 auto negotiating port

Wi-Fi: 802.11 b/g/n compatible

Wireless Encryption: WEP TKIP, AES, WPA/WPA2, WPS, open system, shared key, pairwise key authentication service

Supported Protocols: TCP/IP, DHCP, ARP, ICMP, DNS, NTP, UPnP, RTP, RTCP, HTTPS, SSL, UDP, RTSP, IGMP

General

Ports: (1) 10/100 Ethernet, (1) AC Power

Storage: (1) MicroSD Slot for recording motion events (MicroSD card not included)

Power Supply: (1) 5V 1A, 100-240V AC Adaptor included

Operating Humidity: Up to 85% non-condensing

Operating Temperature: 14°F to 113°F

Outdoor/Indoor Smart Camera

Extremely versatile and extremely powerful. Put it outside, inside, on your doorbell mount, anywhere you want. This device can integrate seamlessly with your existing abode system or act as a standalone product without the need for an abode Gateway. It also does facial recognition.

WiFi Connected

Two-Way Voice Enabled

152° Wide Angle Lens

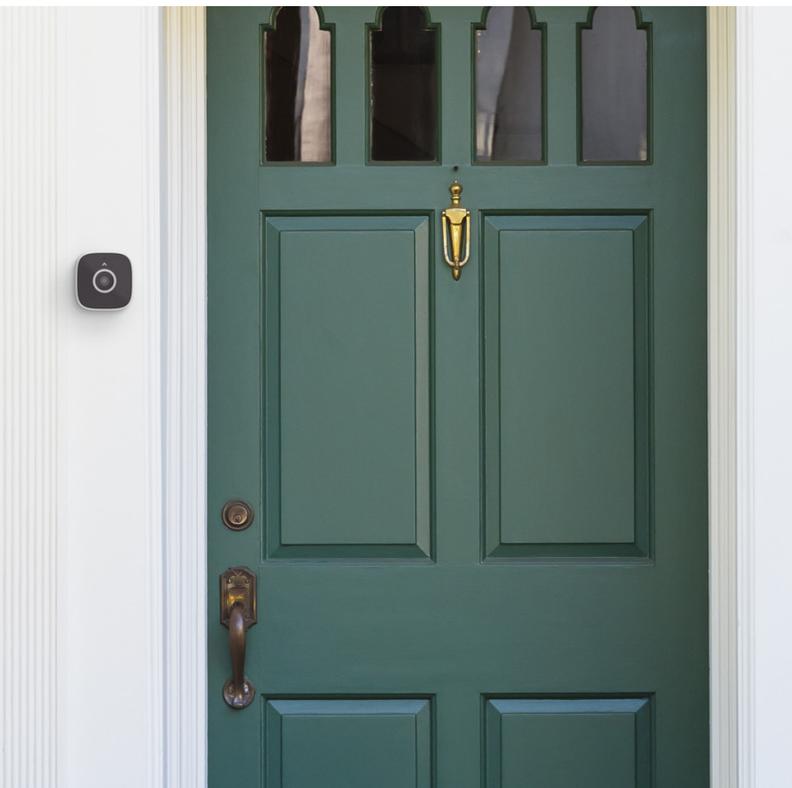

IR Night Vision

PIR Motion Sensing

1080 HD Video

Versatile Placement

We have designed our smart camera to be usable anywhere you could possibly want video coverage.

Use it as a doorbell camera with included doorbell mount

Mount it on an outside wall to keep eyes on every inch of your home

Use it inside either mounted or on a shelf for HD video with facial recognition inside your home

Always Know Who's There

With facial recognition technology, your camera will learn who people are by their facial features. It will alert you when someone you know (or don't) is spotted.

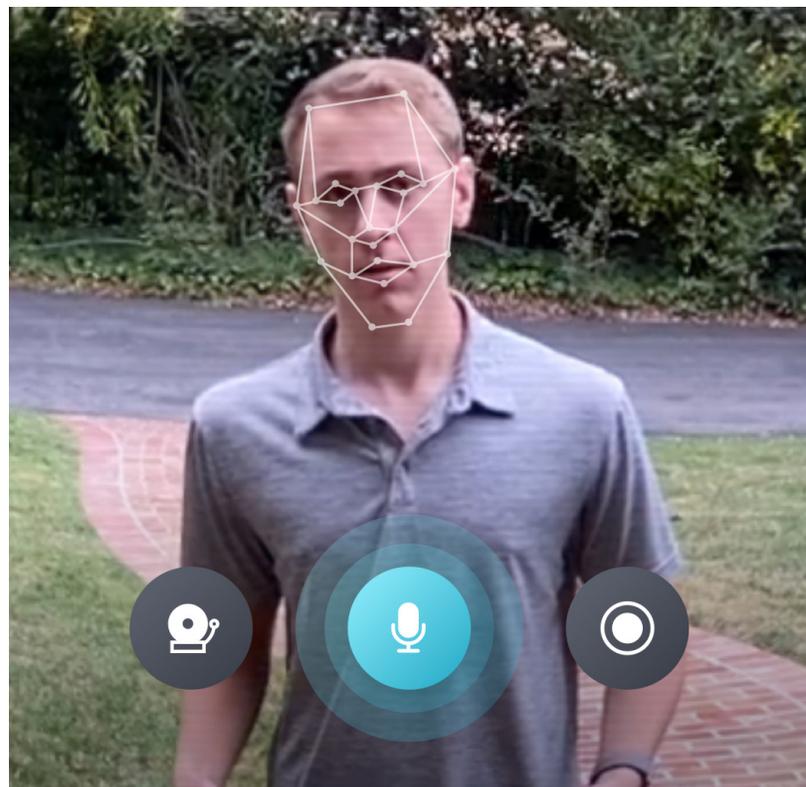

Add profiles to your camera so it begins to recognize certain people and alerts you when they arrive

The more your camera sees someone, the better it will become at recognizing them

Stop trouble at the door with two-way voice communication after you're alerted that someone unknown has been seen

Outdoor Siren

Make sure alarms don't go unnoticed with a loud alarm and strobe when triggered.

Draw attention when it is needed most.

The Outdoor Siren was designed to protect you and your home when you need it the most with these powerful features:

Long battery life of up to three years

Heavy duty, IPX5 waterproof (and UV Resistant) housing for long outdoor life

Wireless communication to abode allows for easy, wire-free installation

Bright, LED Strobe Light alerts responders to an alarm

Customizable sounds and chimes to meet your needs

Always vigilant.

When your abode alarm activates, the outdoor siren will sound. Additionally, police, neighbors, and other responders will quickly notice the visual strobe light to call attention to your home during an alarm.

Loud Siren

The 107 decibel siren is loud and can be heard during crucial moments

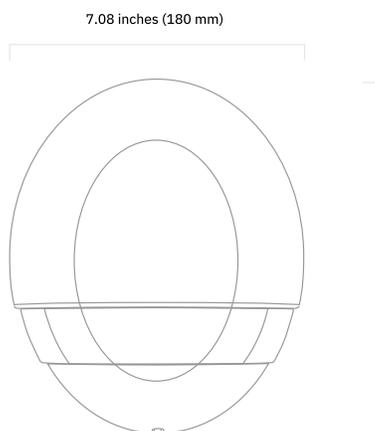

Distinct Sounds based on event

Different sound patterns for intrusion and smoke/fire alarms are designed to command attention based on the event

Technical Specs

Size and Weight

Height: 8.41 inches
Width: 7.08 inches
Depth: 2.27 inches

Siren Specifications

Alerts: Alarm Siren, Door Chime, Fire/Smoke, Low Battery

Communication Protocol: 433MHz

Power/Batteries: 3V, D Alkaline batteries x 2 (2 included)

Battery Life: 3-Years in normal operating environments (temperature, distance from gateway, and number of siren activations can impact battery life)

Supervision: Randomized supervision signals to ensure proper function

General

Operating Humidity: Up to 85% non-condensing

Operating Temperature: -13°F to 140°F

Warranty: 1-Year Limited Warranty

Indoor Siren

Sound the alarm loudly anywhere in your home.

Make sure alarms don't go unnoticed.

The Indoor Siren has powerful features to keep you and your home safe:

Built-in battery that stays constantly charged and keeps your siren ready to activate even when the power is off

The 95dB siren warns intruders that your home is fully secured

Setup whether you'd like door open and close alerts to play through the siren based on your needs

Installation is a snap. Simply plug the siren into an AC outlet at the desired location and pair the device to your abode system

Sound the alarm. Wherever you want.

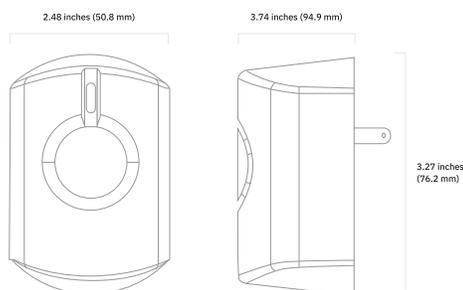

The Indoor Siren provides a convenient way to play abode system sounds in rooms that are far away from the abode Gateway's location. Simply plug in the siren into an AC outlet at the desired location and pair it to your system.

- ✓ The add-on siren sounds a loud (95 decibel) alert if your alarm activates on your abode system
- ✓ The siren also provides configuration options to play the exit warning timer to conveniently remind you the system is arming
- ✓ Additionally, it can also be configured to play entry warning beeps to remind you the system is armed and needs to be disarmed prior to the alarm sounding

Technical Specs

Size and Weight

Height: 3.27 in (76.2 mm)
 Width: 2.48 in (50.8 mm)
 Depth: 3.74 in (94.9 mm)
 (uninstalled, with AC plug)

Siren Specifications

Power Input: 90-230V AC Power.
 Plug Format: Type A, US.
 Communication Protocol: 433MHz.
 Siren Output: 95 dB at 1 yard.
 Backup Battery Time: Fully charged, approximately 12 hours.
 Supervision: Randomized supervision signals to ensure proper function.

General

Package Contents: (1) Indoor Add-On Siren, Quick Start Guide.
 Operating Humidity: Up to 85% non-condensing.
 Operating Temperature: 14°F to 113°F

Keypad 2

The perfect addition to your system, our new & improved keypad features a built-in motion sensor to alert you to your system status every time you walk by, backlit buttons for easy low-light arming and disarming, and more.

The convenience of a keypad -- elevated.

We packed our new keypad full of features designed to make it the ideal tool for easily arming and disarming your system.:

Set up to 40 unique PIN codes

Backlit buttons allow for easy arming & disarming in low-light

Built-in motion detection displays your system status every time you walk by

Rechargeable battery lasts up to 6 months (charging cable included)

Magnetic wall mount allows for easy, versatile placement

Customizable: turn off sounds & motion detection

What's Different from the Original Keypad?

We took in a lot of the feedback and came up with an improved version of our keypad. Some key differences include:

The abode logo now lights up in different colors to indicate what status your system is currently set to

Built-In motion sensor means the system status flashes every time someone walks by for an easy, quick check

The new keypad is thinner than our older version

Updated, more modern design

Rechargeable battery that lasts up to 6 months fully charged.

Magnetic Wall Mount

Also new to this version of the keypad, the included magnetic wall mount allows for easy & secure placement on almost any flat surface.

Easily remove from the mount when it is time to charge and place back on when your battery has reached full power.

Technical Specs

Size and Weight

Height: 3.1 in
Width: 5.7 in
Depth: 0.8 in

Package Include

15 Backlit Buttons
Built-In Motion Sensor
Panic, Fire, And Health Modes
Conserves Battery By Entering Sleep Mode While Not In Operation
Operates In Temps From 14° to 122°
Communication Protocol: 433MHz

Smoke Alarm Monitor

Make any smoke detector in your home a smart, connected device.

Door & Window Sensors designed for your home.

Our Door/Window Sensor is the perfect solution for protecting the perimeter of your home. Here are some features of the sensor:

Long battery life of up to 6 years

Compatible with all UL Smoke Detectors

Easy installation with no tools required

Wireless and compatible with abode

Your smoke detectors just got smarter.

What good is a smoke detector if you are not home when it activates? The abode Smoke Alarm Monitor solves this common problem by making every Smoke Alarm a Smart Smoke Alarm. It listens to UL-Listed smoke alarms and will automatically alert you in real time if the detector is activated.

Real Time Notifications

Receive instant notifications to your iPhone or Android in the event your smoke detector activates.

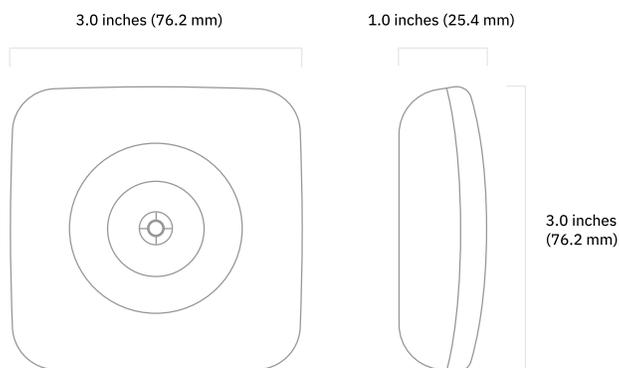

Professionally Monitored

For customers on abode's Secure Plan, our monitoring center can automatically take action to alert your local fire department when seconds count

Technical Specs

Size and Weight

Height: 3.0 inches
Width: 3.0 inches
Depth: 1.0 inches

Size and Weight

Communication Protocol: 433MHz.

Power Source: 3V, CR123A Lithium battery x 1.

Battery Life: 6 years*.

Operating Temperature: -10°C to 45°C (14°F to 113°F).

Operating Humidity: Up to 85%
non-condensing.

*Note: Actual battery life may vary due to device settings, operating environment and usage activity.

Water Leak Sensor

Prevent costly water leaks before they become a problem. Receive immediate alerts to your phone and email when water is detected.

Water leaks are costly. We can help.

Be immediately notified when water is detected so you can act quickly and prevent water damage.

Quick notifications to your mobile phone
