

FIBARO
Home Center

3

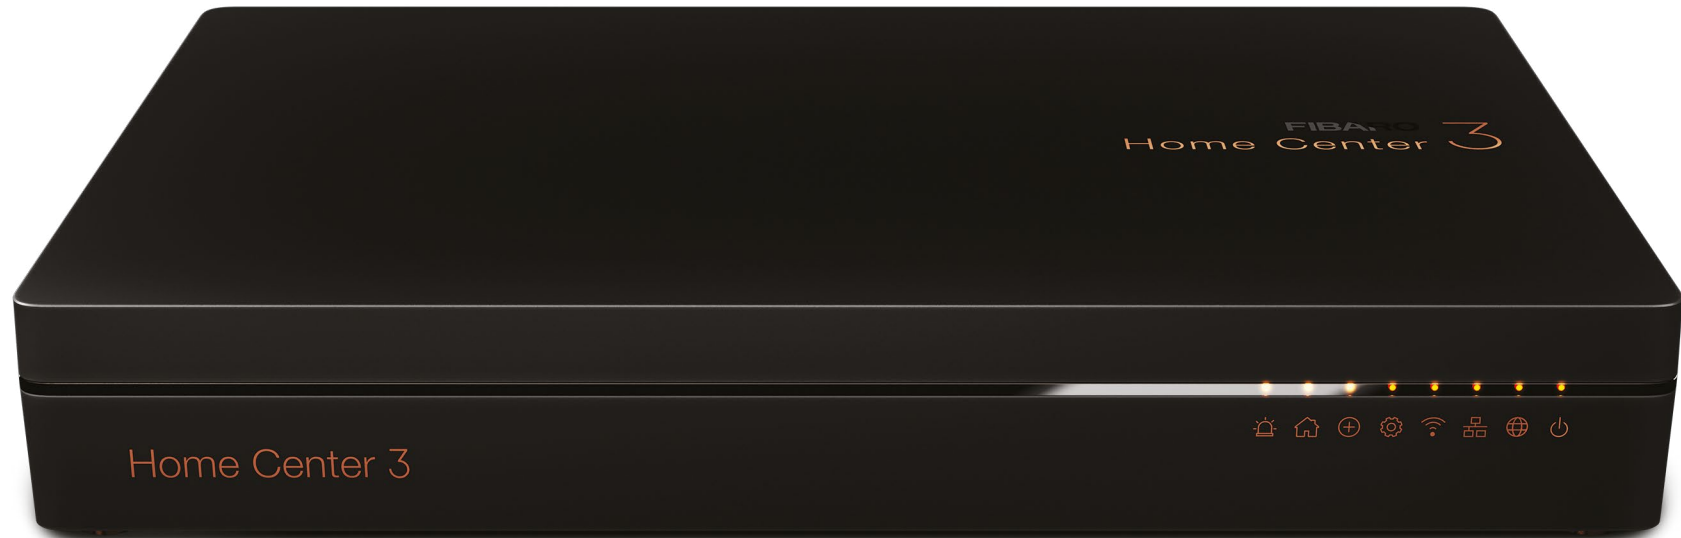

New for 2020

**A true game-changer
of smart home market!**

Discover the brand-new Home Center 3 that will take your smart home life to the next level!

Let us introduce the real breakthrough technology! FIBARO is all about delivering game-changing, finest solutions and today, we are more than happy that the 10th anniversary of our company can be marked by the launch of such a revolutionary product!

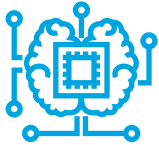

Home Center 3 is the most advanced smart home hub available on the market. It combines the most outstanding and cutting-edge features in terms of hardware technology and UX characteristics. The device has been created in close cooperation with FIBARO users and installers and comes as the result of our ten years smart home experience. Integrate FIBARO with over 2000 third-party products operating in various technologies and easily control different kind of smart appliances such as lighting, roller blinds, HVAC, alarm, surveillance or watering system – everything done with a simple press of a button, gesture or with a word. Everything packed up in an ingenious and refined design.

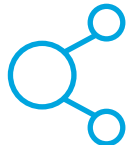

Unquestionable data security

Your data is always safe with FIBARO. Simple as that. State of the art hardware security technologies along with transmission encryption guarantees efficient protection of user data against breaking into your system. Peace of mind through fast, easy and secure backup of user data in the cloud.

Cutting-edge stability – reliable home

Unparalleled usability, stability and efficiency thanks to its powerful 4x1,2 GHz processor, 2 GB RAM of memory which makes it outperform other devices of this kind. It makes it the most optimized and powerful device of its kind on the market.

Seamless integration – use what you already own

The hub lets you use not only FIBARO products, but also over 2,000 devices operating in various technologies. Home Center 3 has been determined to be the most compatible gateway in its class.

Unlimited possibilities – for the little and the great needs

Literally everyone can install, manage and use it on daily basis. The built-in wizard will help you set up your smart home and automations the way you want. From simple scenes of turning the lights on and off in specific situations, to more complex automations. Advanced users and experts will appreciate hundreds of essential features that they helped to develop, like Block Scenes, LUA events, and Quick Apps.

Future-proof – enjoy your smart home for years

Durability and performance of Home Center 3 is based on high capability components. It goes hand in hand with the sustainability trends and reduces carbon footprint and human impact on the environment. By joining powerful components with unique software the smart home hub will last for years maintaining its top performance.
