

MyNice

The reliable professional alarm system for a secure connected home.

Nice

Everything under control, even at a distance

With MyNice, you can manage your home alarm system and automations easily and safely using a single device.

Feel at home, feel protected

MyNice movement detectors guarantee maximum protection both outside and inside, even when you're at home. The vertical double curtain sensor can also detect transit through doors and windows even when open. Live your home in complete freedom, without compromising on safety.

Feel at home and never be alone

With MyNice, your home welcomes you by opening the gate, turning the lights on and deactivating the alarm. Antipanic function, burglary alarm and medical alert with you at all times.

Feel at home even when you're far away

With the MyNice World app, you can manage your home even at a distance, opening and closing awnings, blinds and rolling shutters, turning lights on and off and activating and deactivating the alarm. With Nice PhotoPir, you can also receive real time images and check what is happening in your home at any moment.

Nice

MyNice control unit: your home at your fingertips

Thanks to the colour touch display and intuitive navigation menu, managing your alarm system and home automations has never been so easy.

Characteristics

Bidirectional communication between the alarm devices, guaranteeing reception of the sent commands and confirming their execution

Protection of up to 99 zones in 6 areas to create a made-to-measure system for all types of home

Wide range of control devices: iOS and Android apps, transmitter, keypad with safety code, transponder badge

Built-in Wi-Fi module

Optional PSTN and GSM/GPRS modules to communicate the alarm status via text or voice message

Up to 64 different Nice radio automations can be memorised

Create the right scenario for every situation

Set personalised scenarios and activate them with a simple gesture. For example, the "Return home" scenario opens the gate and garage door, turns the lights on and deactivates the alarm.

Users with customised functions and access

Have you called the gardener, but you're not at home? No problem! With MyNice, you can associate up to 64 users, each with an individual access code and different functions enabled.

A home that knows your habits

Wake up every morning with sunlight and go to sleep every evening without worrying about turning the lights off or the alarm on: memorise your favourite scenarios and programme them for whatever days and times you want.

Safety and comfort, for them too

Thanks to the MyNice detectors' Pet Immunity function, you can enable the alarm even when your small pets are at home, avoiding improper alarms.

Everything under control, wherever you are

In the event of an alarm, or on request, the Nice PhotoPir detector lets you receive real time images on your smartphone in a few seconds, visible even in the dark thanks to the built-in flash.

24h total protection

MyNice protects you not just from intrusion, but also from accidental undesired events: the flooding and smoke detectors signal an incipient fire or flood immediately.

Deterrence and prevention for a safer home

MyNice guarantees top safety and protection for your home, preventing intrusions even before they occur.

1 Pre-alarm

PhotoPir and notification
The system warns you if entry or movement in the monitored area is detected and the Nice PhotoPir detector sends you a detailed image in real time.

2 Deterrence

Alarmed area. Keep away!

Voice siren
If someone approaches your house, the voice messages emitted by the siren warn them that the area is protected by an alarm system.

3 Alarm

Warning and sound from sirens
As soon as someone forces a window or door to enter your home, the sirens are activated and the system informs you and the police of the intrusion.

A complete range to facilitate integration

Control units
Wireless and mixed wireless and wired, with touch screen and easy intuitive navigation menu.

Local and remote management
Transmitter with four icon keys, wall-mounted or portable keypad, transponder badge and iOS and Android app: with Nice, you're spoilt for choice.

Deterrence and warning
Outdoor and indoor siren with voice messages and built-in flashing light.

Safety and protection
Wide range of volumetric and magnetic contact detectors for installation indoors or in protected outdoor environments.

Professionalism and service: the added value of Nice specialists

A highly qualified team of professionals provides complete support during design and installation to create a system made-to-measure for your home.
